

Dear Parents and Carers,

Survival Afternoon

On Wednesday 7th February, we will be having a survival afternoon as part of our Year 2 scientific learning. The children will be spending the whole afternoon outside; building shelters to stay warm and dry, ensuring they are dressed appropriately for the weather and ensuring they have access to food and water. This is an application task to provide them with opportunities to show what they have learnt about humans needs for survival. We would like the children to pack a bag of clothing to bring for the survival afternoon. Please could we ask that you encourage them to be independent in this choice, so we know they have understood the need to choose appropriate clothing for the weather and staying warm outside. The children will be encouraged to think practically on the day about how they can stay hydrated and energised with food. Please ensure your child brings their clothing (named) in a named carrier bag next Wednesday.

If you have any questions, please speak to your child's class teacher.

Thank you for your continued support,

The Year 2 Team
