School Policy

Social media (e.g. Facebook, Instagram, LinkedIn) is a broad term for any kind of online platform which enables people to directly interact with each other. However, some games, for example Minecraft or World of Warcraft and video sharing platforms such as You Tube have social media elements to them.

The school recognises the numerous benefits and opportunities which a social media presence offers. Staff, parents/carers and pupils are actively encouraged to find creative ways to use social media. However, there are some risks associated with social media use, especially around the issues of safeguarding, bullying and personal reputation. This policy aims to encourage the safe use of social media by the school, its staff, parents, carers and children.

Scope

This policy is subject to the school's codes of conduct and acceptable use agreements.

This policy:

- Applies to all staff and to all online communications which directly or indirectly, represent the school.
- Applies to such online communications posted at any time and from anywhere.
- Encourages the safe and responsible use of social media through training and education

The school respects privacy and understands that staff may use social media forums in their private lives. However, personal communications likely to have a negative impact on professional standards and/or the school's reputation are within the scope of this policy.

Professional communications are those made through official channels, posted on a school account or using the school name. All professional communications are within the scope of this policy.

Personal communications are those made via a personal social media accounts. In all cases, where a personal account is used which associates itself with, or impacts on, the school, it must be made clear that the member of staff is not communicating on behalf of the school with an appropriate disclaimer.

Personal communications which do not refer to or impact upon the school are outside the scope of this policy.

Digital communications with pupils/students are also considered. Staff may use social media to communicate with learners via a school social media account (for example, a year group Youtube Channel) for teaching and learning purposes but must consider whether this is appropriate and consider the potential implications.

Risks

The school recognises the risks associated with use of the Internet and social media and regulates their use to ensure this does not damage the school, its staff and the people it serves. Principal amongst these risks are:

- cyber bullying by pupils/students;
- access to inappropriate material;
- offending behaviour toward staff members by other staff or pupils/students;
- other misuse by staff including inappropriate personal use;
- inappropriate behaviour, criticism and complaints from external sources;
- loss or theft of personal data;
- virus or other malware (malicious software) infection from infected sites;
- disclosure of confidential information;
- damage to the reputation of the school;
- social engineering attacks - i.e. the act of manipulating people into disclosing confidential material or carrying out certain actions;
- civil or criminal action relating to breaches of legislation;
- staff members openly identifying themselves as school personnel and making disparaging remarks about the school and/or its policies, about other staff members, pupils or other people associated with the school.
